REMARKS

Claims 1, 6, 11, 16, 18 and 20 are amended. Claims 1-27 remain in the application.

The above independent claims are amended to refer to the respective 64M, 16M and 4M integrations referred to in the application specification as-filed. Applicant originally intended the above claims to be specifically directed to these respective generations of numbers of memory cells on a die/chip without being limited to the specific seventh digit number of the 4,000,000, 16,000,000 and 64,000,000 integrations. No new matter is added by the above amendments as such are fully supported in the specification. See for example, pages 2 and 34-40.

Entry of the above amendments, and prompt examination of the application and issuance of a Notice of Allowance is urged.

Respectfully submitted,

Dated: 4/16/96
